

STRANDLINE
resources limited

Emerging Mineral Sands developer – Australia and Tanzania

Project Engineer Mechanical

- **Fixed term 18 months**
- **Site based (Gascoyne Region)**
- **FIFO**

Strandline Resources Limited is on an exciting journey from developer to major mineral sands producer. The Company's strategic plan has it constructing the world-scale Coburn mineral sands project in Western Australia. Strandline also owns and emerging portfolio of mineral sands growth projects in Tanzania.

Strandline is now seeking an enthusiastic and technically savvy **Project Engineer** to join our project delivery team. To be considered you will need to demonstrate strong experience in the design, construction and commissioning of advanced process plant and/or non-process infrastructure in the resources sector.

Key Personal Attributes include:

- Degree qualification in **Mechanical Engineering**, relevant field or demonstrated industry experience
- Experience in site construction environment in the mining sector (experience in industrial minerals highly desirable)
- 5+ years' experience in **SMP** engineering, procurement, construction and commissioning
- 1+ years' experience with onsite execution and management of site construction activities
- An understanding of the applicable Australian Standards and Codes
- A motivated, self-starter with high attention to detail and pragmatic approach to problem solving
- A good Commercial acumen with experience in interpreting, managing, and driving contractors in accordance with the terms and conditions
- Well-developed oral and written communications skills

Key responsibilities include:

- Manage and prioritise tasks in order to facilitate high-quality project development works, drive strong commercial outcomes and be influential in achieving milestones safely and on schedule
- Establish and maintain effective working relationships with internal and external resources (including consultants, contractors, vendors, authorities and other stakeholders)
- Responsible for compiling, reviewing and analysing of Company and Contractor performance data
- Maintain a thorough understanding of commercial contract requirements, scopes of work, engineering specifications and drawings, QA/QC, commissioning and operations requirements
- Involved in procurement tendering, negotiation and award of contracts in varying execution models. I.e. Supply Only, Installation, Design and Construct.
- Take the lead role in the management and performance of assigned Packages to meet project delivery KPIs
- Prepare high quality presentations and technical reports applying critical thinking and technical expertise
- Contribute to continuous improvement, enhancing delivery methods and working within a multidiscipline project and operational team environment

An attractive remuneration package will be offered to suitably qualified and experienced individuals. We believe this opportunity to join an emerging mineral sands developer and be instrumental in the successful delivery of a world-scale greenfield project is an exciting opportunity for career development and progression.

The role may commence in the Strandline Perth office with a rapid transition to the project site (in Shire of Shark Bay, WA) on an industry standard family friendly roster, as required to discharge all duties of the role and deliver the project in accordance with project time, quality, cost and safety objectives.

The role requires a strong commitment to health, safety, environment and community, including indigenous engagement and stakeholder management.

We are an Equal Opportunity Employer and promote equality and diversity. Indigenous Australians and candidates from minority groups are encouraged to apply.

Please note only successful applicants will be contacted **No advertising agencies will be accepted.**
