

STRANDLINE
resources limited

Emerging Mineral Sands developer – Australia and Tanzania

Project/Package Engineer – EI&C

- Proven project controls professional with planning expertise
- Project Delivery, Construction, Commissioning and Operations Handover
- Construction ready, world-class mineral sands project, situated in Gascoyne region of WA

Strandline Resources is on an exciting trajectory from explorer to mineral sands producer. The strategic plan has it advancing the Coburn mineral sands project in Western Australia (with key development approvals in place and project financing and early works execution activities underway). The Company is also undertaking extensive exploration and evaluation activities along the coastline of Tanzania, including at the Fungoni and Tajiri mineral sands projects in Tanzania, creating a potential pipeline of project and operational opportunities.

The Company is now looking to appoint a skilled and experienced EI&C project engineer professional to join the Client project management team. To be considered you will need to be able to demonstrate experience in the construction of process and/or non-process facilities in a mining or related environment through the development phase, including detailed engineering, procurement, construction and operations readiness phases.

Key Personal Attributes include:

- Degree qualification in Electrical Engineering, relevant field or demonstrated industry experience
- Experience in construction within the mining resource sector (Mineral Sand highly desired)
- 5+ years' experience in EI&C construction
- A motivated, self-starter with attention to detail
- Good interpersonal skills with a pragmatic approach to issue resolution
- Commercial awareness in the execution of construction projects in the resource sector
- Strong computer literacy skills with high proficiency in the use of Microsoft office software (Excel, Word, Power Point, Outlook)

Key responsibilities include:

- Liaise with Strandline's owner's team, contractors and consultants in order to achieve the project delivery objectives
- Responsible for compilation, review and analysis of Company and Contractor performance data
- Maintain a good understanding of the contract, scopes of works, engineering specifications and drawings, and identify variations under the contract to any of the commercial and/or technical requirements
- Experience in the tendering, negotiation and award of contracts in varying execution models. I.e. Supply Only, Installation, Design& Construct.
- Take the lead role in the management and performance of assigned Packages to meet project delivery objectives
- Contribute to continuous improvement, enhancing delivery methods and working within a multidiscipline project and operational team environment

An attractive remuneration package will be offered to suitably qualified and experienced individuals. We believe this opportunity to join an emerging mineral sands company and be instrumental in the success delivery of a world-class greenfield project development is an exciting opportunity for career development and progression.

The role will commence in the Strandline Perth office and relocate to the project site (in Shark Bay, WA) on an industry standard family friendly roster, as required to discharge all duties of the role and deliver the project in accordance with project time, quality, cost and safety objectives.

The role requires a strong commitment to health, safety, environment and community, including indigenous engagement and stakeholder management.

Applications should be forwarded to enquiries@strandline.com.au, addressed to Karen Trapnell and reference to role title (**RE: Project/Package Engineer – EI&C**).

We are an Equal Opportunity Employer and promote equality and diversity. Indigenous Australians and candidates from minority groups are encouraged to apply.

***Please note only successful applicants will be contacted* No advertising agencies will be accepted.**
